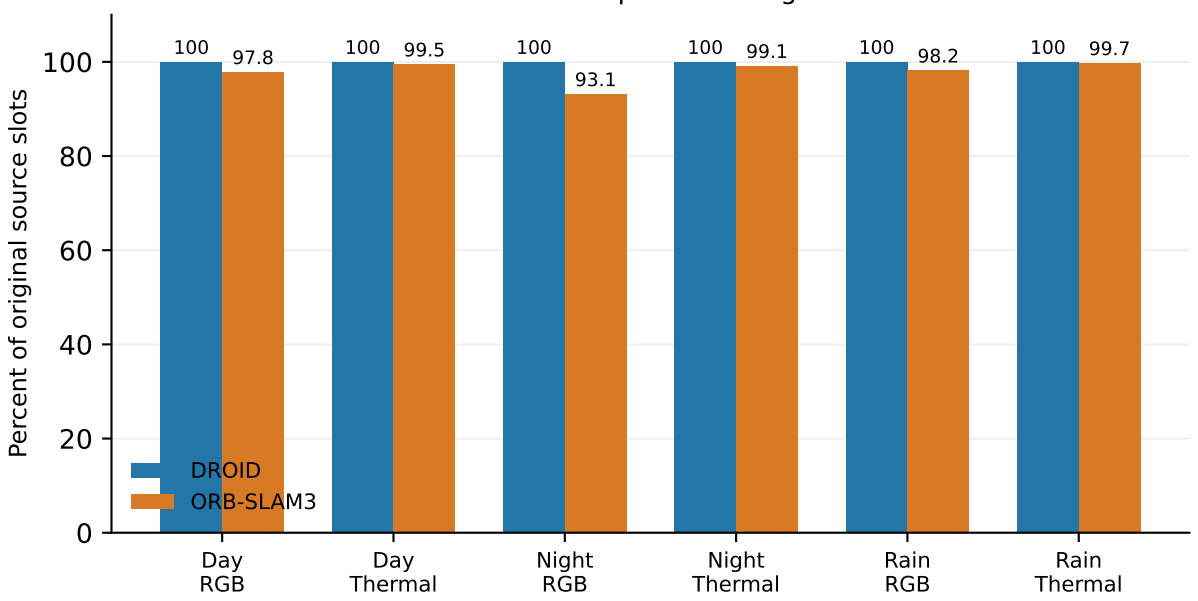
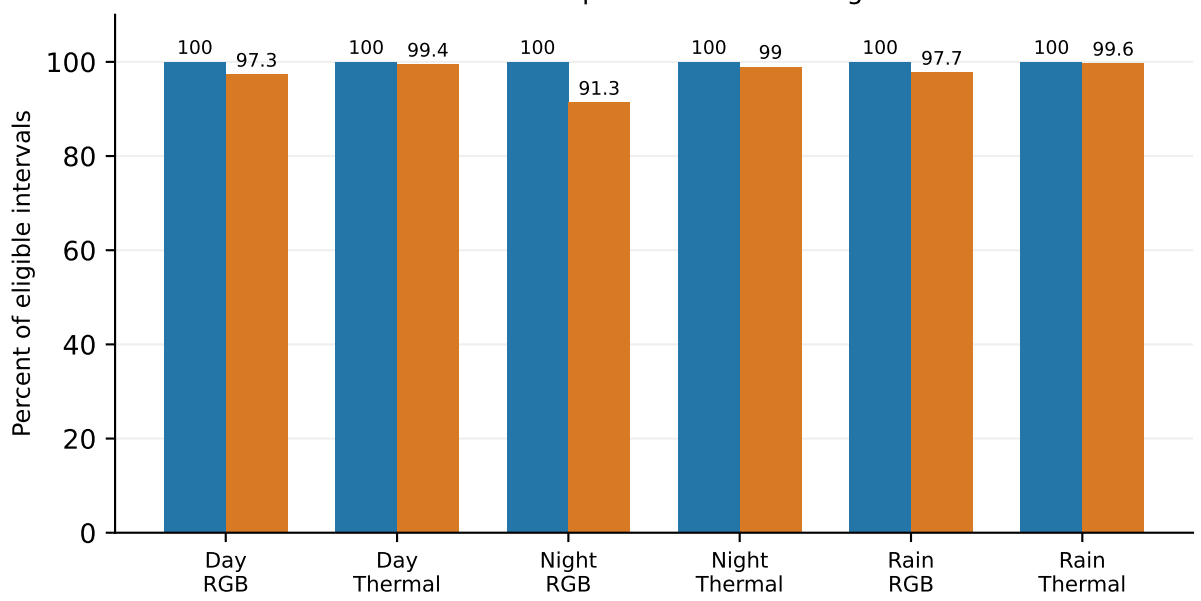
Full-record ORB-SLAM3 and saved DROID: coverage, breaks and matched-support error

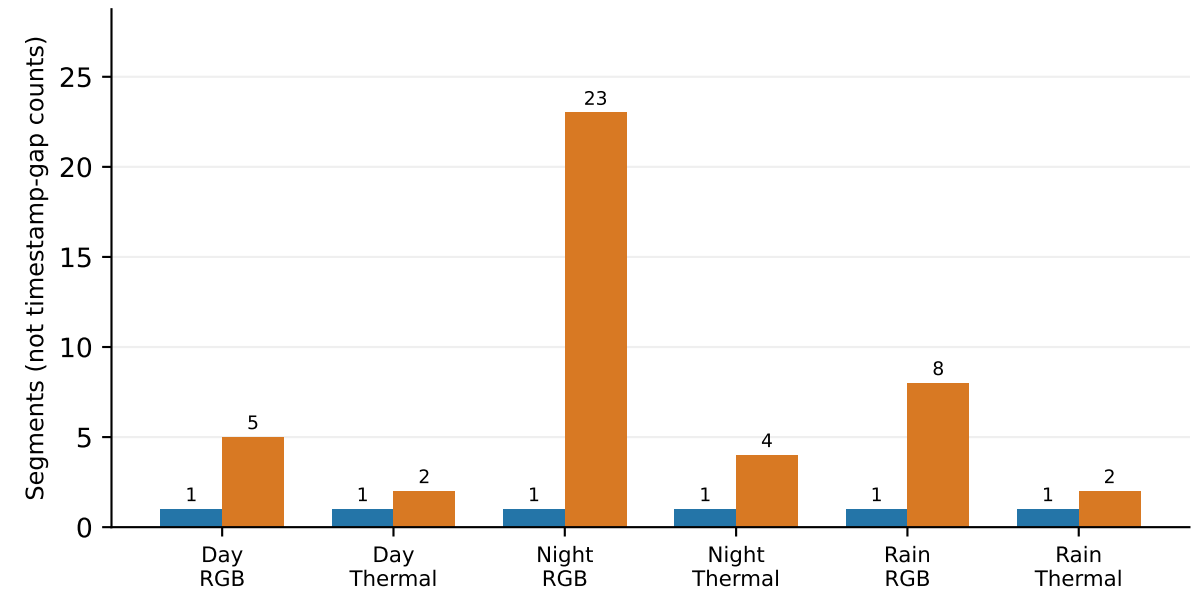
Returned pose coverage



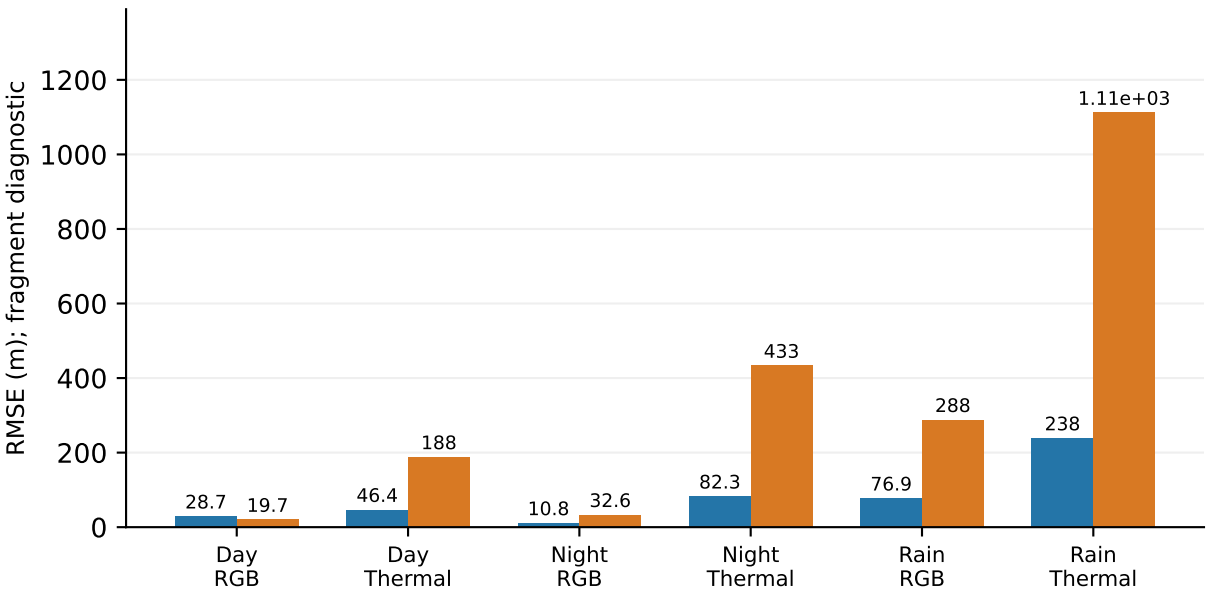
Reference-qualified RPE coverage



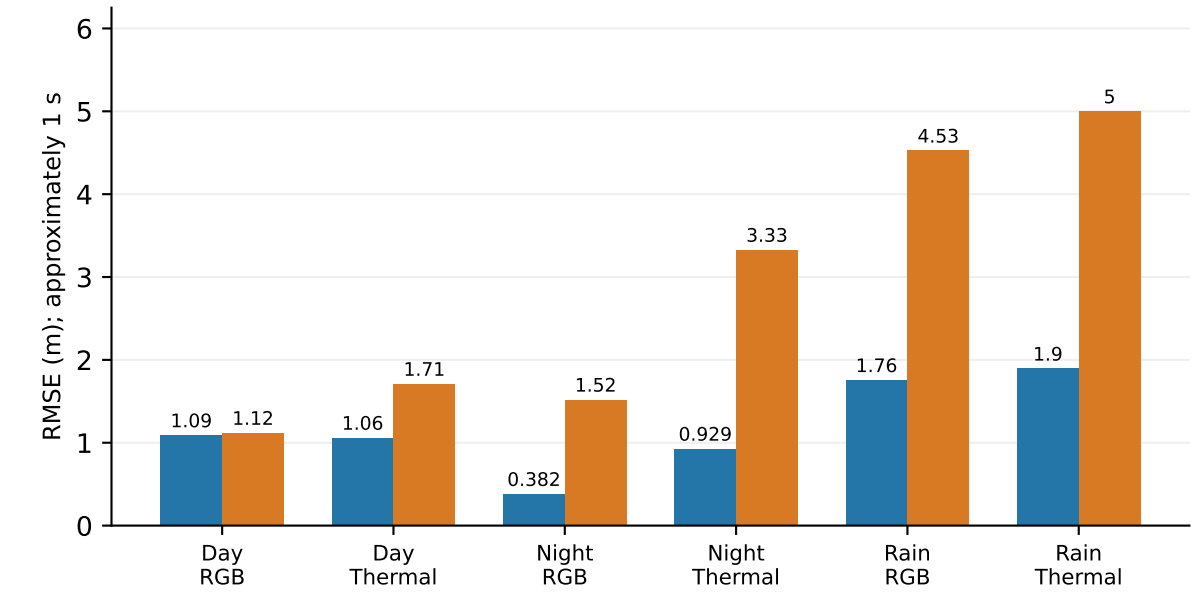
Published map-continuity segments



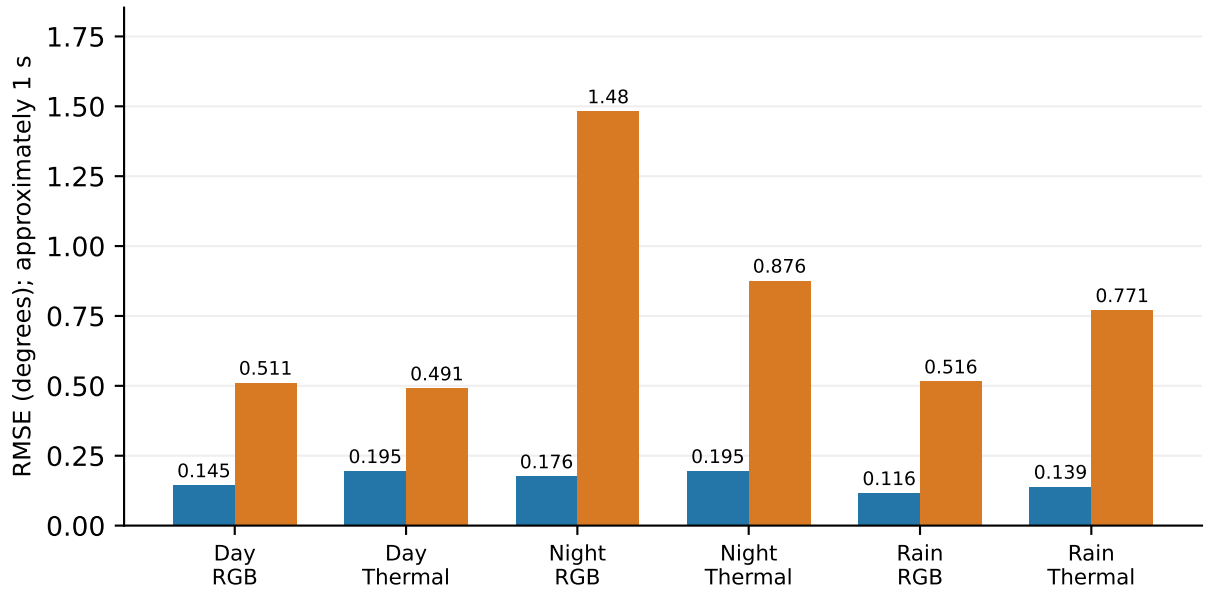
Origin ATE on identical ORB output fragments



Translation RPE on identical ORB intervals



Rotation RPE on identical ORB intervals



Provided-camera development references; physical timing unverified. Fragment error is not a complete-trajectory win.
Bottom three panels mask DROID to ORB outputs/map fragments; native DROID outputs and reset behavior are unchanged.
