EXP117: 1,150 guarded core pairs; request masks retain dense native state and timing
No measured inference savings, native sparse-gap validation, pose improvement or deployment claim
Recorded-observation masking only
requested pair observations / dense core (%)
TD3
MS2
Full read
Bounded probe
No periodic probe
Unbounded hold
Fixed RGB
Fixed thermal
Guarded pre-input availability
unavailable choice + no trusted choice
Stored stale states remain explicit
maximum stored resolved-state age (s)
